

SHORT DURATION BB-RATED HIGH YIELD STRATEGY

SEEKING TO CAPTURE INCOME WITH DISCIPLINED RISK CONTROL

Objective

The Chartwell Short Duration BB-Rated High Yield Strategy seeks income and long-term capital appreciation by investing primarily in high yield debt securities with an average duration of less than three vears.

Seeking to deliver stable income and capital preservation

Chartwell's Short Duration High Yield strategy stresses preservation of capital and compounding of income with bonds that we believe trade at attractive relative values.

This modification was made strictly for fax purposes only, with no effect on Chartwell's ownership, management, roster of employees or investment advisory services provided to its clients.

On April 29, 2016, The Killen Group, Inc.'s (TKG) personnel, operations and assets were acquired and merged into Chartwell's business as a result chartwell's prior parent company acquired the long-only investment management business of Columbia Partners, based in Chevy Chase, MD. The deal represented approximately \$1 billion of AUM in Fixed Income and Equity relationships.

On June 1, 2022, Chartwell investment Partners, LLC., was acquired by Raymond James Investment Management, the asset management subsidiary of Raymond James, Inc. (MYSE: RIF) which is based in St. Petersburg, Horida, with no effect on Chartwell's management, roster of employees or investment advisory services provided to its clients.

Services provided to its clients. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policy and procedures are designed to calculate and present performance in compliance with the GIPS standards. GIPS is a registered trademark of CFA Institute. LFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Short Duration BB-Rated High Yield Fixed Income Institutional composite has been examined for the period January 1, 2007 to June 30, 2022. The verification and performance examination reports are available upon request.

upon request. The performance data quoted represents past performance; past performance does not guarantee future results. Current performance may be lower or higher than the performance data quoted, the gross returns were calculated on a time weighted basis, including all dividends and interest, accrual income, realized and unrealized gains or losses and are net of all brokerage commissions, execution costs and do not give effect to investment advisory fees, which would reduce such returns. The net returns presented above were calculated by applying the highes; institutional investment advisory fee paid by a client of chartwell. The investment advisory fee schedule for institutional investment advisory on first \$20 million, 0.40% on the next \$30 million, 0.50%, on all additional assets. Historically, bonds have indeed provided less volability and less risk of loss of capital than has equity investing. However, there are many factors which may affect the risk and return profile of a pxedincome portfolio. The two most prominent factors are interest-rate movements and the creditworthiness of the bond issuer. Generally, when interest rates rise, bond prices fall and when interest rates

fall, bond prices generally rise. The risk of a change in the market value of the investment due to changes in interest rates is known as interest-rate risk. Interest-rate risk is subject to many variables but may be analyzed based on various data (e.g., effective duration). The risk that the issuer may default on interest and/or principal payments is often referred to as gredit risk. It risk is typically measured by ratings sugar or principal payments is often referred to as gredit risk. It risk is typically measured by ratings sugar or principal dayments is often referred to as gredit risk. It risk is typically measured by ratings sugar or various general research years of a measure or with grawal at any time by the assigning Rating Agency. Batings and insurance do not remove market risk since they do not durantee the market value of the bond, soons succeed by the U.S. Government have significantly less risk of default than those succeed by corporations and municipalities. However, the overall return on sovernment bunds entered the proceeds of a maturing investment must be invested in a lower vielding security, all other things held constant, due to changes in the interest-rate environment. Investors should pay careful attention to the types of fixed-income securities which comprise their portiolio, and remember that, as with all investments, their is the risk of the loss of capital. Mortage-backed securities (MSS) are subject to scheduled and unscreduled principal payments as homeowners pay down or prepay their mortageas. As a result, the effective maturity of incipal payments as homeowners pay down or prepay their mortageas. As a result, the effective maturity of an orgade-backed securities are created by pooling loans from a variety of sources and issuing bonds which are backed by these loans, treditivorthiness stems from the error did quality of the underlying loans, as opposed to corporate bonds in which credit worthiness is derived from the earning owner of the lessing company. The primary risk of these
